

Box Drill CAN

CAN A Network

CAN Terminator

SRM Backbone

CAN Connector

DBM is located in the cab of the tractor. Harness 725154 carries CAN A & CAN B to the hitch

CAN A

CAN B

CAN B Terminator

It is recommended that all Box Drills utilize only CAN A. SRMs doing high speed control (like SeederForce) on a given rockshaft need to be on one CAN network to be used in the control algorithm.
