CAN to Backbone Harness

The diagram shows a CAN bus connector with a red pin and a blue pin. These pins are connected to a backbone harness, which is represented by a red and blue block.

APEX Connection

The diagram shows an APEX connector with a green pin and a red pin. These pins are connected to an APEX harness, which is represented by a green and red block.

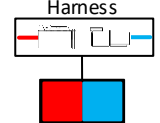

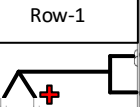

Diagram illustrating a connection between a green block and a red block. A green cable is connected to a green block, and a red cable is connected to a red block. The connection is shown as a single line between the two blocks.
