

eSet Filler Kit

The eSet Filler Kit is designed to reduce agitation in the seed pool with smaller seeds and to prevent overfilling in rough conditions.

eSet Filler Kit (720393) Components

eSet Filler Kit (720393) Installed

Step 1: Insert filler ring into disk.

Step 2: Use holes and center punch to mark hole locations.

Step 3: Using a No. 44 drill bit, drill through marked hole locations.

Step 4: Tighten screws to seat plus 1/8 turn. Screw should not protrude from the seal-side of the disk to avoid damaging the seal.

Step 5: If removing the filler, fill the drilled holes with an epoxy material.
