## Fendt 900 Vario MT/1100 Vario MT or Challenger MT700/900 Radar and NMEA Connections

This guide is intended for use when connecting the 20|20 to a Fendt 900/1100 or Challenger MT700/900 tractor to acquire Radar data and NMEA strings.

### Radar Data Connection

Use the connection labelled **Tractor Mounted Sensor Interface** located on the *rear* top connection panel as shown below. This connection requires the use of the Precision Planting **727122** Radar Adapter Harness.

ISO Bus EXT Connector

- Power sockets

- Tractor mounted sensor interface

## NMEA Output Connection

Use the NMEA port located next to the fuse panel behind the operator seat, as shown below. This connection requires the use of Precision Planting **725599** Universal GPS Adapter Harness.
