

Precision Planting Graphite Powder

This premium graphite extends wear life and improves meter performance. Graphite provides the lubrication needed to prevent wear on meter components. It also improves seed flow and can improve meter performance. But, as with most things, a little is good, but a little more can be bad.

5 lb Jug

Part # 930015

1 lb Bottle

Part # 930011

Recommended Amount

Don't exceed the recommended amounts. Too much graphite can inhibit seed flow – especially in high humidity.

- A teaspoon per bag (80,000 seeds per unit) is recommended.
- Mix the graphite into the seed to prevent uneven settling.
- When using heavy seed treatments, increase amount to 2 teaspoons.

Limited Warranty: Since Precision Planting does not control the application of this product, nor the condition of the surfaces to which they are applied, a Limited Warranty is provided. If the product does not perform as specified, for whatever reason, we will replace it. Precision Planting's liability will under no circumstances exceed replacement of the product.

Precision Planting Graphite Labels

Precision Planting Graphite Powder
Precision Planting Graphite Powder ensures proper lubrication of finger pick-up corn seed meters, brush-type soybean meters and other seed meters.

Directions for use:

For finger pick-up meters, add at least one teaspoon for each unit of seed corn (80,000 kernels).

In high humidity conditions or if you are using seedbox or seed applied seed treatments, add at least one and a half tablespoon of graphite.

For brush-type meters in soybeans, add at least one teaspoon for each bag of seed.

Refer to your meter or planter manufacturer's operators manual for their recommended rates.

Precision Planting Graphite Powder

For lubrication of seed meters

900RM-99501

Graphite dust may cause minor irritation to eyes and nasal passages. Use an approved dual respirator to protect from nuisance dust.

Net Wt. 1 lb (16 oz)

Contents: 1 lb (16 oz)

This package is filled by weight. Settling will occur during shipment and handling.
