

YieldSense® JD Moisture Sensor Plug Kit

Parts List:

- ◆ 750213 JD Moisture Sensor Deutsch Cap (Qty. 1)
- ◆ 750214 JD Moisture Sensor Metri-pack Cap (Qty. 1)
- ◆ 750697 JD Moisture Sensor GT Cap (Qty. 1)

The JD Moisture Sensor Plug Kit is used on combines where a factory-installed JD moisture sensor has been removed. The plug allows the elevator speed signal to be communicated through the CAN system. There are three different harnesses used to connect to the JD factory-installed moisture sensor. This kit includes one plug for each type. You will only use one of the three included caps—the one that matches the harness installed.

Instructions: Locate the Green Star moisture sensor (Figure A) and unplug the two plugs from the back (Figure B). Identify the type of connector on the harness (Figure C) and use the matching cap from the kit to plug the connector (Figures D—F).
