ATTENTION: All Keeton Firmers

Down tension should be checked at the beginning of each season. Ideal firmer tension is a minimum of 20oz at the beginning of the season. Attach a small hanging scale (ie Fish Scale) to the firmer near the end of firmer. Slowly lift the hanging scale until the firmer begins to lift from ground. For additional info, see Keeton Seed Firmers: Preparation for Planting

Universal & Drill Tails- To adjust tension on the firmer, tighten the tension screw to get 20 ounces.

Quick Attach- Replace tails if tension (downforce) is less than 20 ounces.
