

Kinze 4900 Lift Switch Installation

Step 1:

Assemble the push button lift switch harness to the lift switch bracket as shown.

Step 2:

Use provided hardware to assemble the bracket and lift switch assembly loosely to the parallel arm.

Step 3:

Slide the lift switch bracket forward or backward until the lift switch just depresses by contacting the goal post when the planter is fully lifted. The lift switch bracket should “clock” off the top and bottom of the parallel arm when properly positioned.
