

vSet[®] vSet 2 Paddle Shim Kit

768603

Parts List

- 768569 vSet 2 Paddle Shim (Qty. 4)

This kit should be installed with vSet 2 meters to prevent dust and debris from becoming packed behind the vSet disk and vacuum seal.

Step 1

Remove the vSet disk from the meter and then remove the entire shim pack from beneath the disk. Refer to vSet 2 Meter Installation Instructions for assistance with removing the disk and shims if needed.

Figure 1

Step 2

The paddle shim has the same thickness as a white shim. Set aside one white shim from the shim pack removed from the meter.

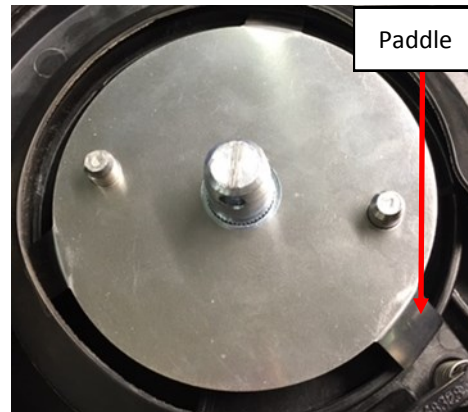

Figure 3

Step 3

Install one 768569 Paddle Shim with the paddles facing downward on the meter hub and underneath the vacuum seal as shown in figure 3.

Step 4

Reinstall the white shims removed in step 1, except for the shim set aside in step 2 to set the correct height of the disk. Use the shim gauge on the vSet 2 housing to verify that the installation and shim count is correct. Adjust as needed, referring to the vSet 2 Installation Manual for assistance if needed.
