

vSet 2 Straight Fittings Kit (CIH 1255 w/1.5" Hose)

Parts List

- 731104 Vacuum Hose Meter Fitting (Qty. 1)
- 731101 Vacuum Hose Coupler (Qty. 1)
- 1.5" Row Unit Hose not included

The 731309 vSet 2 Straight Fittings Kit is used for 1255 Case IH planters outfitted with vSet 2. You will install 1.5" row unit hose to complete the installation.

**Step 1**

Cut the 1.5" row unit hose to length. Some rows may require additional length depending on the distance from the manifold fitting to the row. Do not cut the row unit hose too short. A general starting point is 4' per row.

Step 2

Use the 731101 vacuum hose coupler to clamp the Case IH row unit hose directly to the manifold. Secure the worm gear clamp to the manifold. Slide the 1.5" row unit hose into the other side of the coupler and secure. On 16 and 24 row planters you will connect the flexible coupler to a welded pipe.

Figure 2

Step 3

Carefully route the row unit hose above the cross member bracket.
