## CASE IH X150 & X250 CAN/GPS Installation

Just as in the 2013 or newer flagship machines both the X150 and X250 machines have a 3 pin AMP connector just below the key as shown.

For CAN & GPS for the X150 & X250 you will find those behind the access door behind the operator to the right.

Note: You may have to modify the door to get the harnessing to fit to get the access door closed.
